Rubberwood is:

- ✓ a durable hardwood, similar to Maple or Ash
- ✓ Straight Grained, light in color, easy to stain and match
- ✓ Dense grained, less prone to shrinkage and warping
- ✓ Sustainable
- ✓ Eco friendly

Rubberwood

Rubber trees exude a milky white latex sap which is collected in buckets during the harvesting process. The sap is used to make natural rubber.

Once the trees reach the end of their productive life, they are harvested in a sustainable and Eco friendly manner.

Our rubberwood counter tops are made from finger jointed blocks, which are individually pieced together, ensured maximum strength, rigidity and warp resistance. They are available in 20mm, 32mm and 44mm thickness.
